

East West University

CSE479: Web Programming

Lab Manual: Lab 7 (PHP File and XML)

PHP File

1. Assume you have two files.
2. You have to take input from both files using PHP File system.
3. You have to check the similarity of the word content from both files using Jaccard similarity.

PHP XML

1. Insert the content of the following XML file into a MySQL table.
2. Retrieve the data to a HTML table from MySQL.

```
<?xml version="1.0"?>
<brightstar>
  <name>Sirius</name>
  <magnitude>1.45</magnitude>
  <distance>9</distance>

  <name>Canopus</name>
  <magnitude>-5.53</magnitude>
  <distance>310</distance>

  <name>Rigel Kentaurus</name>
  <magnitude>4.34</magnitude>
  <distance>4</distance>
</brightstar>
```
